

An Innovative Range of Lower Fee Solutions to Drive Costs Down

“Price is what you pay. Value is what you get” Warren Buffett (Investment Consultant)

The true value of a measurement service is the degree to which it can assist a main contractor in securing profitable work.

However, many contractors still purchase on the basis of lowest cost so we have designed services and solutions that can also bring costs down.

The Benefits of Lower Cost Solutions

- Range of measurement services from simple “major dimensions” through to fully resourced bills that reduce bid preparation costs.
- Solutions and formatting that reduce the work of the main contractor’s estimating staff.
- Less variation within bills leading to lower bid levels and a reduction in negative claims.
- Consultant services offering cost savings options on design and build projects.

A Few of the Methods We Use

- A business model that gives us a lower cost base than most EQS’s and main contractors.
- Bespoke solutions designed, tested and developed to meet specific contractor requirements.
- Holistic solutions that consider both the internal and external costs of bidding, together with the effects on performance, and that of the bid and the secured work.

“Things which matter most must never be at the mercy of things which matter least.” Johann Wolfgang von Goethe (Writer)
